To ensure the delivery of 21st century health care, Hoag has begun extensive interior renovations of the facility and it will remain closed during the conversion. Renovations include the addition of state-of-the-art operating rooms and imaging equipment, reconstructing pre- and post-surgery and recovery areas and preparing space for new and innovative technology. Hoag Hospital Irvine will open as an acute care general hospital offering a spectrum of inpatient and outpatient services, as well as a fully staffed emergency room.

Earlier this year, Hoag assumed a long-term lease for the hospital facility formerly known as Irvine Regional Hospital and Medical Center. The facility will be an extension of Hoag's services in Newport Beach and its seven Hoag Health Centers located throughout Orange County.
