Children's Demographics

Total Population: 846,604

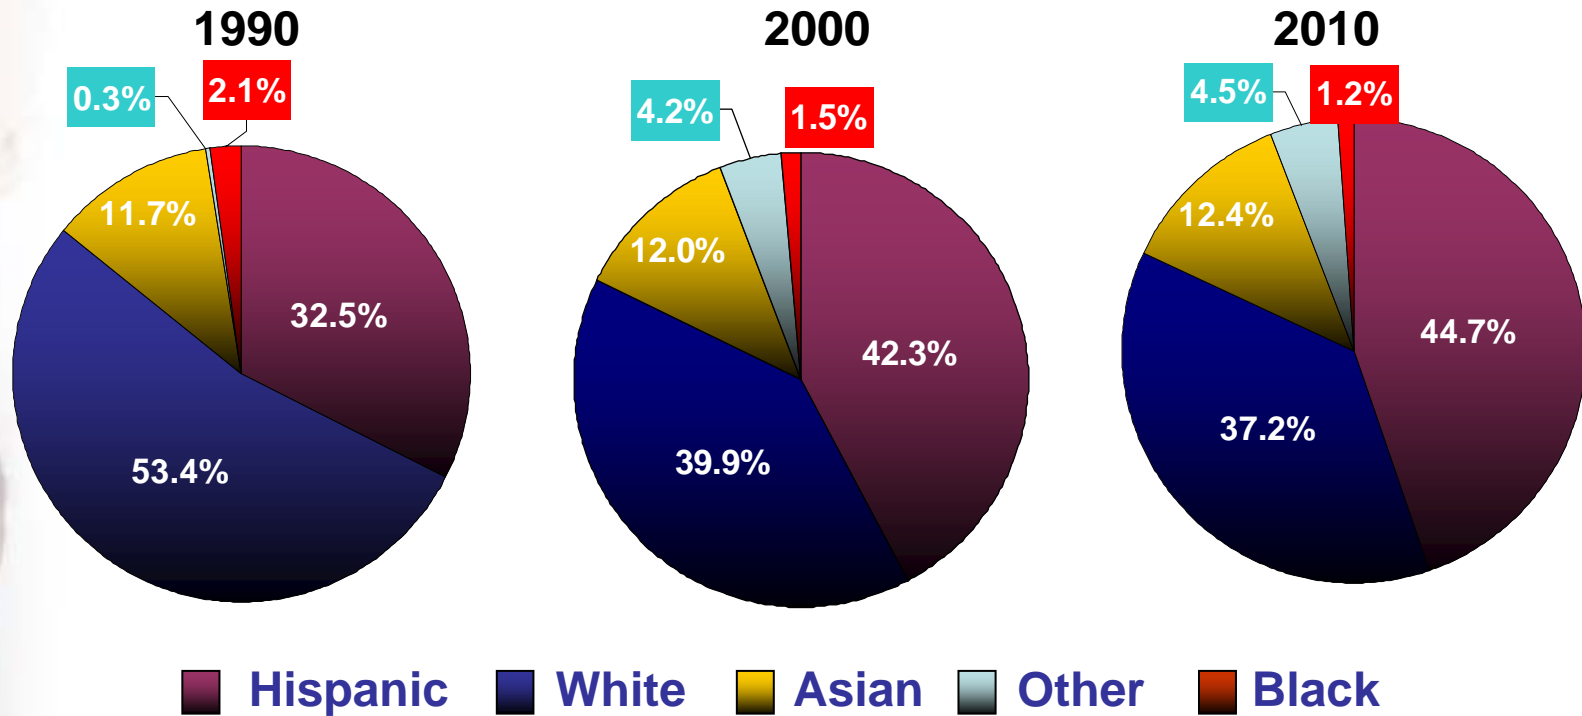

AGE DISTRIBUTION

Children's Demographics

Orange County's Children

Population 0-17 Years by Race/Ethnicity,
1990, 2000 & 2010 (projected) by race/ethnicity

The image features three children stacked vertically on the left side of the slide. At the top is a young girl with brown hair and bangs, smiling. In the middle is a baby with light skin and blue eyes, looking upwards with an open mouth. At the bottom is a young boy with dark hair, smiling broadly. The background of the slide is white.

Children's Oral Health

- Dental caries is an infectious, transmissible, and progressive disease that can be prevented
- Children with caries may experience pain and have trouble sleeping and eating, which can affect their general health
- 33% of Orange County 3rd graders have visible, untreated decay, above the State average of 27%

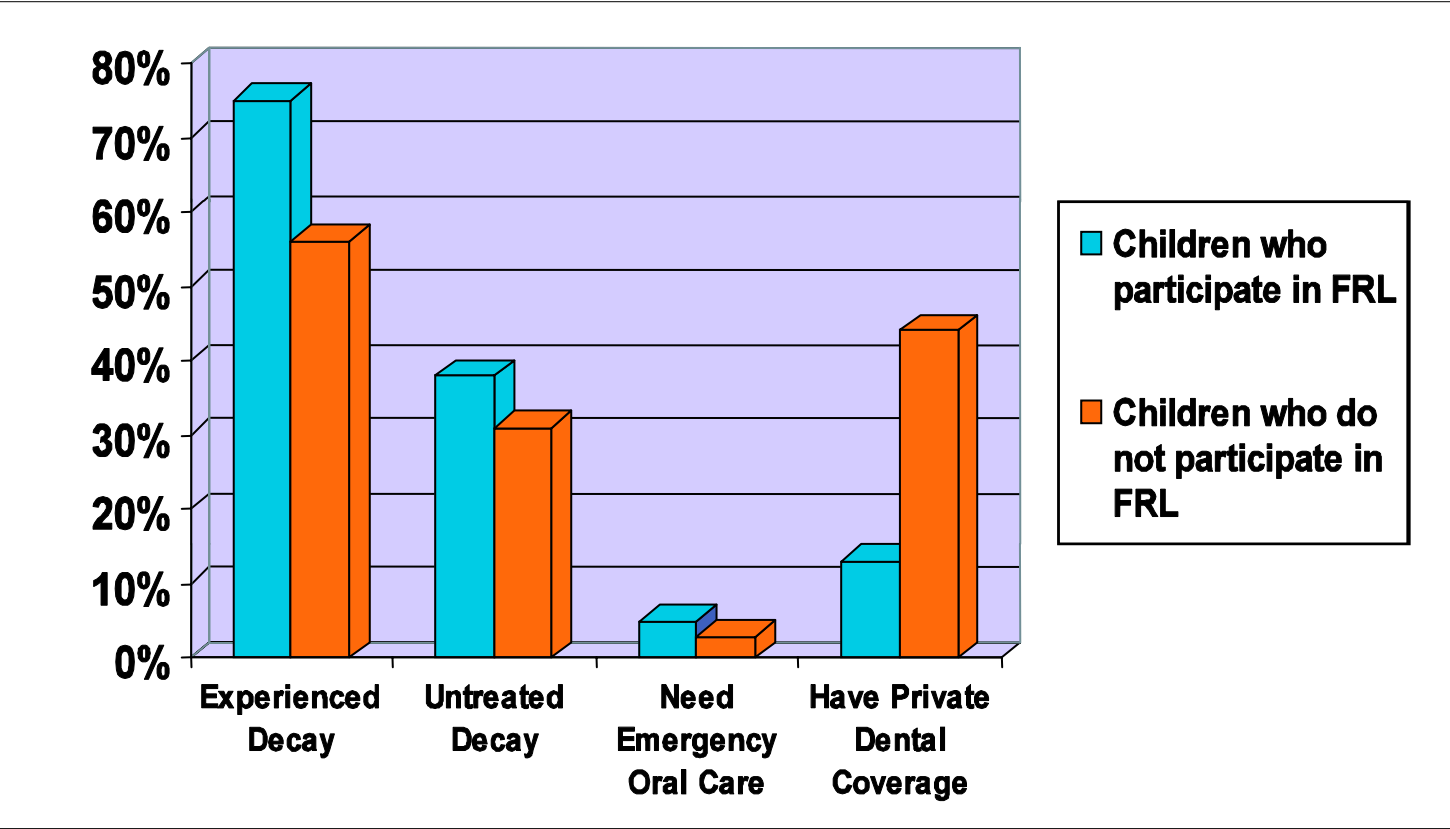

Children's Oral Health

Access to Care

- 19% (152,089) of children do not have dental coverage; this number has increased 5% since 2001.
- For children between ages 0 to 5 years:
 - 17.5% (44,654) are without any form of dental health coverage.
 - Another 18.3% (47,579) have publicly funded health coverage such as Denti-Cal.

Children's Oral Health

Child's Socioeconomic Status

Children's Oral Health

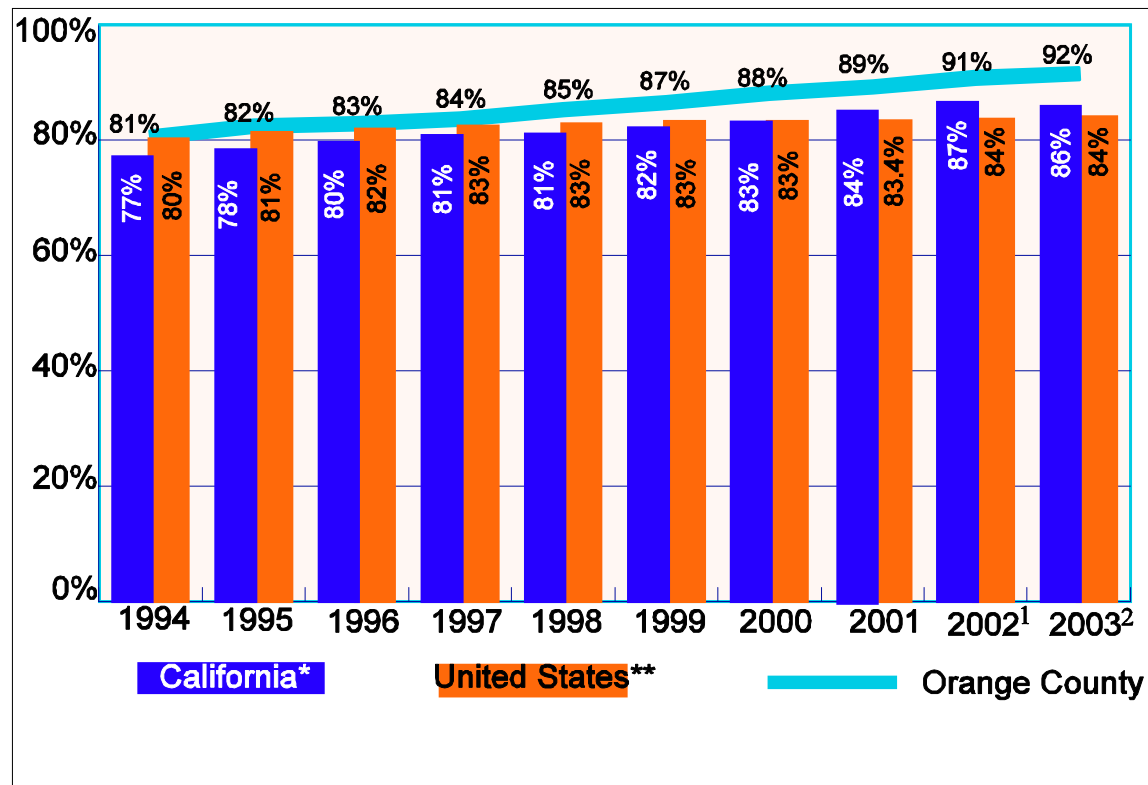

Ongoing Efforts in Orange County

- 24 dental centers provide education, prevention and/or treatment services to low-income children
- A recent addition to the field is **Healthy Smiles for Kids**
- During 2005/06, programs funded by the Children and Families Commission screened 10,612 children ages 0-5
