HHW Collection Centers cannot accept the following items:		
Asbestos Ammunition Biological waste	Commercial Waste Explosives	High-pressure cylinders (acetylene, oxygen, air tanks—SCUBA or SCBA) Radioactive materials Tires
Visit www.oclandfills.com for disposal information of these items.		

What is Household Hazardous Waste?

Leftover household products that contain corrosive, toxic, ignitable, or reactive ingredients are considered to be "household hazardous waste" or "HHW." Products, such as paints, cleaners, oils, batteries, and pesticides that contain potentially hazardous ingredients require special care when you dispose of them.

Improper disposal of household hazardous wastes can include pouring them down the drain, on the ground, into storm sewers, or in some cases putting them out with the trash. The dangers of such disposal methods might not be immediately obvious, but improper disposal of these wastes can pollute the environment and pose a threat to human health.

Additional HHW services may be available through your City. Contact your City's Recycling Coordinator to find out other ways to dispose of your household hazardous waste items in your community.

Note Regarding Disposal of Expired and Unused Medicine

Most medicines used in a home are not considered hazardous waste. They can be disposed of in the trash after being secured in durable packaging. Specific disposal instructions can be found at www.oclandfills.com. Click on Hazardous Waste.
